MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

Guardian Managed Income & Growth Portfolio (the "Fund") aims to provide a balanced portfolio that emphasizes growth of capital, with some level of income generation, through diversified investment in Canadian and foreign equity or equity-related securities and in fixed-income securities, either long-term or short-term.

The Fund invests in securities of other investment funds managed by Guardian Capital LP, and may also invest in other securities, including exchange traded funds, to achieve its objectives.

Strategic and tactical asset allocation is used to construct a portfolio diversified by investment style, asset class and geographic region. Currently, the Fund's long-term asset mix policy is 60% equities and 40% bonds and, if the asset mix varies by more than 15% from the long-term mix, the Fund is normally rebalanced.

Risk

The risks associated with investing in the Fund remain as discussed in the prospectus. The Fund may be suitable for investors with a low to medium tolerance for risk, particularly those who seek a balanced portfolio that produces income and some growth and who plan to hold their investment for the medium to long term.

Results of Operations

(Please note that this Fund invests all, or substantially all, of its assets in other Guardian Capital Funds [the "Underlying Funds"]. Individual securities referenced in this commentary refer to the securities held in one of the Underlying Funds, not a direct holding of this Fund. This commentary is based on the performance of Series I units of the Fund. Returns for other Series of units may vary, largely due to differences in fees and expenses. Please refer to the Past Performance section for specific Series level performance details.)

The Fund's net asset value decreased by 9% to $261.2 million at December 31, 2022 from $286.3 million at December 31, 2021. Of this change, a decrease of $28.8 million was due to investment performance and an increase of $3.8 million was attributable to net subscriptions.

Series I units of the Fund posted a return of -8.96% for the year. The Fund's blended benchmark, 40% FTSE Canada Universe Bond Index, 30% S&P/TSX Capped Composite Index and 30% MSCI World Index (Net C$), returned -11.7% for the same period. The Fund's return is after the deduction of fees and expenses, where applicable for the Series, unlike the benchmark's return.

Market conditions have proven quite challenging in 2022. The war in Ukraine and the ongoing pandemic (COVID lockdowns in China in particular) weighed on global economic momentum and exacerbated supply-side challenges that factored into keeping inflationary pressures stubbornly elevated, and forced central banks to move to rapidly unwind their crisis-era policy stimulus. Elevated costs of living and sharply higher costs of capital have greatly impacted consumer and business sentiment, feeding into reduced economic growth forecasts that raised the risk of the global economy entering a recession – economic activity, however, was resilient overall through 2022 despite headwinds.

This backdrop proved to be particularly difficult for investors as there has been nowhere to hide — all asset classes and regions turned in historically poor performance. That said, resource-focused economies and markets, including Canada, have managed to outperform as commodity prices surged amid geopolitical tensions and constrained supplies.

The positive contributions from security selection in Canadian equity, Global equity and fixed income were the primary factors driving the relative outperformance of the Fund versus its blended benchmark. The Fund's tactical bias toward shorter duration securities and corporate credit within fixed income contributed positively to the Fund's performance, as these areas performed better than the broader bond market and the Fund's blended benchmark. The Fund's strategic bias toward income-oriented equity in both Global and Canadian equity allocations made a positive contribution to the Fund's relative performance as these strategies outperformed the broad stock market benchmarks. The Fund's tactical overweight to Global equity (the worst performing asset class in 2022) detracted from the Fund's relative performance versus its benchmark. The Fund's tactical bias toward growth strategies in the Global equity allocation detracted from performance as these underperformed the broader market.

The Fund's large allocation to the Guardian i3 Global Dividend Growth Fund made a material positive contribution to relative performance, as the strategy significantly beat the Global equity benchmark in 2022. The Fund's allocation to the Guardian Strategic Income Fund made a material positive contribution to overall performance relative the Fund's benchmark as this fixed income strategy's return beat the FTSE Canada Universe Bond Index by a wide margin. The Fund's overweight exposure to the Guardian Canadian Equity Fund made a positive contribution to relative performance, as the strategy keep pace with its benchmark (the top performing asset class). Exposure to the Guardian US Equity All Cap Growth Fund and Guardian Emerging Markets Equity Fund each detracted from Fund performance as these strategies materially underperformed both their asset class benchmark (MSCI World Index) and the Fund's blended benchmark.

The Fund re-established a position in the Guardian Canadian Equity Income Fund in March, to increase exposure to the Energy sector that appeared poised to benefit from the a rise in commodity prices on the back of Russia's invasion of Ukraine and consequent economic sanctions. The weight was taken, in part, from the core position in the Guardian Canadian Equity Fund, which held less exposure to natural resources (particularly Energy). Market rallies through the second half of the year were treated as opportunities to pare back risk exposures, with allocations to Equity (particularly the core Global Equity strategies held in the Fund). Funds were reallocated to the Guardian Investment Grade Corporate Bond Fund, as this strategy focuses on high quality credit in the middle part of the yield curve, an area that was viewed as being a likely beneficiary of market repricing of over-aggressive rate hike expectations. These moves were accretive to Fund relative performance in the period.

The Fund continues to be underweight Fixed Income and within the asset class, the allocations remain biased toward shorter duration and corporate credit (duration of Fixed Income component of the portfolio is below the duration of the FTSE Canadian Universe Bond Index). The Fund remains overweight Global Equity in its tactical asset allocation while Canadian Equity is at the Fund's strategic weight, allocations within both tilt in favour of quality growth strategies.

As this Fund is a fund-of-funds, it does not directly engage in proxy voting or active engagement, this is conducted by the Manager of the Underlying Funds, who integrates ESG considerations into its investment analysis and stewardship activities with the objective of enhancing long-term investment performance. Active engagement and proxy voting are a core part of the Underlying Fund Manager's stewardship approach, and the Underlying Fund's investment team participates in these activities in a manner suitable to the asset class and Underlying Fund. The investment teams of the Manager of the Underlying Funds focus on ESG and other issues which they believe could be financially material and/or impact the long-term sustainability of the company. The consideration of ESG issues is one of a number of elements in the portfolio construction process and, may or may not have a material influence on portfolio composition at any given time. For more information, the Underlying Funds' Manager posts its annual proxy voting activities and an annual Responsible Investing report on its website: https://www.guardiancapital.com/investmentsolutions/

Recent Developments

Recent macroeconomic developments have been positive and suggest that there may well be a broader runway for policymakers to navigate a "soft landing"; however, the outlook remains risk-laden and highly uncertain. The impact of the (still ongoing) tightening campaign undertaken by a historically broad number of global central banks is likely to become increasingly apparent in the months ahead. Broader concerns about the outlook and perceived elevated recession risks are expected to weigh on spending, investment and hiring plans, and constrain growth momentum.

Slower demand growth and further easing of supply chain constraints are expected to combine to see inflationary pressures continue to ebb — inflation rates, however, are expected to remain elevated and prevent central banks from moving away from their restrictive policy stances.

Accordingly, while there is limited further upside in interest rates anticipated, there are not much reason to anticipate a material decline in rates either.

The persistence of risks and uncertainty surrounding the outlook suggests that the heightened volatility is likely to remain for the foreseeable future — this should provide a support for safe haven assets and headwinds for risk asset performance. That said, the hard reset of valuations in 2022 and pervasive pessimism makes for a more constructive outlook for market performance. Going into the New Year, the Fund continues to favour exposure to global growth equities, as valuations and upside potential are viewed as compelling.

Related Party Transactions

Guardian Capital LP, the Manager of the Fund, is considered to be a "related party" of the Fund. The Manager is responsible for the day-to-day operations of the Fund and also acts as the portfolio manager, managing the investment portfolio of the Fund. These services are in the normal course of operations and the Fund pays a management fee to the Manager for these services, as detailed in the Management Fees section below. The Manager also receives an Administration Fee from the Fund, amounting to 0.04% of the average daily net asset value of the Fund, in return for the payment by the Manager of all the variable operating expenses of the Fund. The Independent Review Committee ("IRC") has approved the Manager's Policy for this item, and the Manager relies on this approval as a standing instruction from the IRC. The Manager received the Administration Fee and paid Fund expenses in accordance with this Policy during the period. The Manager is a wholly-owned subsidiary of Guardian Capital Group Limited, a publicly traded firm listed on the Toronto Stock Exchange.

The Fund invests all, or substantially all, of its assets in other Guardian Capital Funds (the "Underlying Funds"), which are related issuers. With respect to investments in related issuers, the Manager has relied on the approval that it has received from the Independent Review Committee ("IRC"). The approval requires the Manager to comply with its current policy and procedures regarding investments in related issuers and to report periodically to the IRC. The Manager will not duplicate management fees paid to the Underlying Funds and will not pay any performance fee in respect of any investment in the Guardian Strategic Income Fund.

Management Fees

No management fees are payable or collected for Series I units of the Fund. Series C and Series F units are subject to management fees which are based on a percentage of the average Series NAV during each month, calculated and accrued daily, and payable monthly. The Series C management fee is 1.35% per annum. The Series F management fee is 0.35% per annum. The table below provides a breakdown of services received in consideration of the management fees, as a percentage of the management fees, for the year.

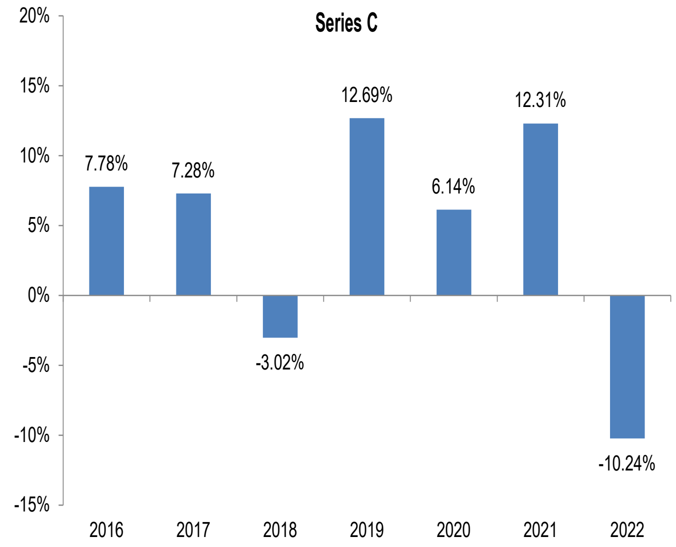
	Series I	Series C	Series F
Investment management and other general administration	n/a	25.9%	100.0%
Trailer Commission	n/a	74.1%	n/a

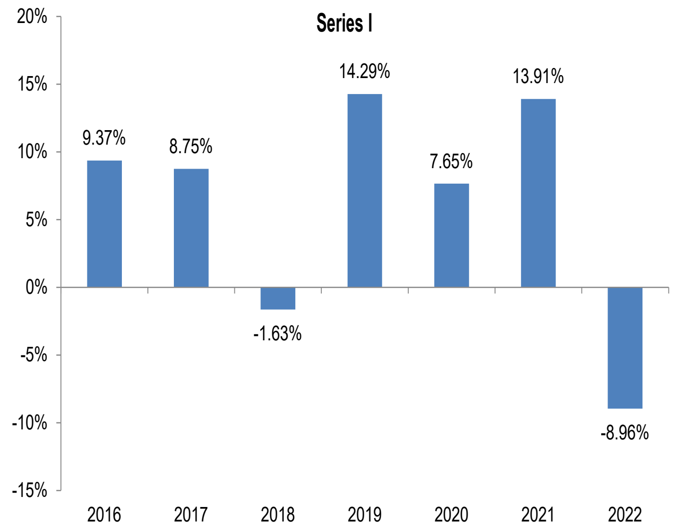
Past Performance

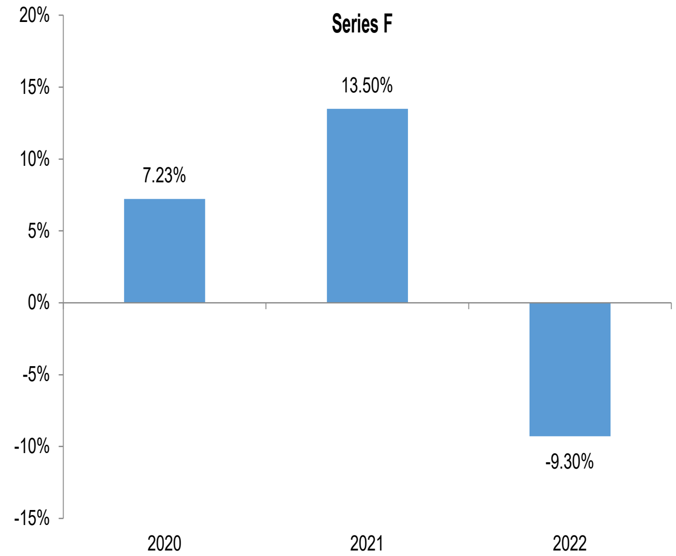
The performance information shown below assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. This performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. Past performance of the Fund does not necessarily indicate how the Fund will perform in the future.

Year-by-Year Returns

The bar charts show the Fund's performance for the period from January 1, 2022, to December 31, 2022 and annual performance for each of the prior years shown, and illustrates how the Fund's performance has changed from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of that financial year.







Annual Compound Returns

The table below shows the historical compound returns of the Fund's Series I, Series C and Series F units for the periods indicated, as at December 31, 2022. The returns of a broad based market index and a custom blended benchmark are also shown.

The FTSE Canada Universe Bond Index is designed to be a broad measure of the Canadian investment grade fixed income market.

The Guardian Managed Income & Growth Portfolio Blended Benchmark is based on the target weighting of the Underlying Funds and their respective market indices. The Blended Benchmark is comprised of the following:

- 40% FTSE Canada Universe Bond Index - a broad measure of the Canadian investment grade fixed income market.
- 30% MSCI World Index (C$) - a broad measure of both large and mid cap equities across Developed Countries.
- 30% S&P/TSX Capped Composite Index - a broad measure of the largest companies listed on the Toronto Stock Exchange, with the relative weighting of each stock capped at 10%.

[1] This information is provided as at the end of each period indicated.
[2] The management expense ratio is based on total expenses (excluding commissions, other portfolio transaction costs and withholding taxes) of the Fund and its proportionate share of the total expenses of the Underlying Funds, where applicable, for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The Manager absorbed some of the Fund's expenses, if it had not done so the MER would have been higher
[3] The trading expense ratio represents total commissions and other portfolio transaction costs of the Fund and its proportionate share of the Underlying Funds' portfolio transaction costs, where applicable, expressed as an annualized percentage of daily average net asset value for the period.
[4] The Fund's portfolio turnover rate indicates how actively its portfolio advisor trades portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in the portfolio once in the course of a year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. We caution readers of this document not to place undue reliance on our forward-looking statements, as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. Actual results may differ materially from management expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to market and general economic conditions, interest rates, regulatory and statutory developments and the effects of competition in the geographic and business areas in which the Fund may invest. We caution that the foregoing list of factors is not exhaustive and that when relying on forward-looking statements to make decisions with respect to investing in the Fund, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, Guardian Capital LP does not undertake, and specifically disclaims, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable law.
